

BetaNYC Workshop

The People's Roadmap to a Digital New York City

February 26 | 6:00 - 8:30 PM
1C - Green Dolphin Lounge

Welcome to the 21st century New York, built by the people, for the people. In this citizen created roadmap, we outline how to humanize technology, move beyond transparency for transparency's sake, and ensure we have government technology that works for the people, built with the people.

We seek your ideas and feedback!

- ◆ What are the current issues and trends we should address?
- ◆ How should government address them?

Join us for this in-person visioning session, and help write the future of NYC's civic/community tech, open data, and civic design!

Universal Digital Freedoms

- ◆ Freedom to Connect
- ◆ Freedom to Learn
- ◆ Freedom to Innovate
- ◆ Freedom to Collaborate
