Many people know about 'yin and yang' from popular culture,
but do you know they are behind the design and beauty of
Snug Harbor's NY Chinese Scholar's Garden?

In this lecture, we'll explore how this and other ideas from
ancient Chinese wisdom are embodied in the garden's design.
You'll get a sense of how the traditional Chinese worldview is
brought to life within its walls. After the presentation, we will
tour the garden to see these ideas in action.
