

Proven Learning Strategies to Increase Student Engagement

Workshop Description

Students come to our classrooms with a set of skills, experiences, and expectations. They all have the potential to move on to higher levels of knowledge and learn new skills. The difference between what students can achieve on their own and what they can achieve with the guidance of an experienced instructor is known as the Zone of Proximal Development, a powerful Constructivist concept.

In this presentation, Fausto Canela, an Instructional Technologist at the Faculty Center, will highlight a series of learning strategies that can help faculty members create an active and creative classroom environment. This presentation will showcase examples, such as **Explanations, multimedia presentation, educational games, and interactive exercises**, created with available, simple-to-use educational tools.

Speaker: Fausto Canela, Ed.D, Academic Technology Specialist- Faculty Center

CSI Faculty and Staff Invited!

**Next Tuesday
November 6, 2018
2:30 - 4:30 pm
