Designing Effective Rubrics: Workshop

Workshop Description

This workshop will cover the design and construction of effective rubrics. It is appropriate for both faculty who are new to rubrics and those who desire further work with them.

Topics will include:

- Basic principles of good rubric design
- Uses of rubrics for both classroom teaching and program assessment
- Using rubrics to evaluate (and teach) both skills and knowledge objectives.

Participants will design a rubric as a part of the process. Everyone should bring an assignment, a learning objective, a program goal, etc., that they feel could be better evaluated using a rubric.

We hope that you can join us for conversation and the opportunity to meet CSI colleagues.

Speaker: Michael Anderson, PhD
Director of Academic Assessment
