Class Descriptions

<u>Guts & Butts</u>	<u>Yoga</u>	<u>Body Sculpt</u>	<u>Zumba</u>	<u>H.I.T</u>	<u>Pilates</u>
A class dedicated to toning of your abs and glutes with targeted movements and cardio. It will focus on core strengthening to build muscles and target your quads and hamstrings as well.	Yoga focuses on breathing and posture to restore the body to a more healthful state. Participants will learn to improve their posture, reduce symptoms associated with high blood pressure, allergies, and other physical imbalances.	This class involves the use of resistance (hand held weights, weighted bars and resistance bands) to improve muscular strength and endurance. Try it out. It's a great way to get toned!	A dance-inspired cardio workout by various rhythms and dancing styles. A combination of fast and slow dance moves that tone and sculpt the body. Just move your body and let the music lead you!	High-Intensity Training (H.I.T) is a mix of cardio and resistance training. Consisting of strength training exercises for a set number of reps or time; while learning to properly perform various skills and basic movement functions. All fitness levels welcome!	This class includes Pilates-style exercises; rings, resistance bands, tubes and resist balls are used to help strengthen and stabilize your torso, build a toned core and build strength throughout the body.

PLEASE NOTE: It can take several classes to begin to feel comfortable with the routines. Feel free to ask your instructor for additional help with the moves! Individuals who do not exercise regularly should check with their physician before starting this or any exercise program. Beginners should participate at their own comfort levels. If you feel out of breath or fatigued, move to a less intense level of exercise. If you feel pain, stop what you are doing immediately. See the instructor to discuss problems you may be having or to have your questions answered.
