Interdisciplinary Studies Programs

Division of Humanities and Social Sciences

Each of our Interdisciplinary programs was developed for interrelationships between fields of knowledge and each pulls together professors from across the campus. Some programs are for undergraduates and some for graduate students. You can major in them for your degree or combine them with others for a double major. Others are minors or certificates that must be combined with a discipline. Check them out. They will make you stand out as someone with strong interests, expertise, and signal that you are ready for the latest approaches to solve the challenges of today's world and workplace.
