

Halloween

SAFETY TIPS

Children should wear flame resistant costumes that allow them to move their arms and walk freely without tripping.

Masks should not impede normal vision, breathing, or hearing, and makeup and face paint should be non-toxic.

Children who trick-or-treat at night should carry a flashlight and wear reflective or light-colored clothing and costumes.

Be aware of your surroundings at all times, and travel in groups.

Adults should inspect all treats before allowing children to consume them.

Halloween treats should only be consumed if appropriately packaged in their original, unopened packages, avoid homemade or unpackaged treats.
